

**TABLE 2. Brain State Correlates of 40 Hz Activity**

State	40 Hz Activity	Spontaneous 40 Hz	Evoked 40 Hz	Resetting of 40 Hz
Waking	Yes			Yes
NREM	No (?)			No (?)
REM	Yes			No

Note: NREM is slow-wave-sleep, stages 3 & 4; each tracing is 600 msec; arrowheads mark presentation of auditory stimuli; S, spindle. MEG data modified from Llinas & Ribary, 1993.
